The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**abrdn Global Infrastructure Equity Fund, a Sterling denominated sub fund of the abrdn OEIC II, Institutional Acc Shares (ISIN: GB00B779VF05). This fund is managed by abrdn Fund Managers Limited.**

OBJECTIVES AND INVESTMENT POLICY

**Investment Objective**

To generate growth and income over the long term (5 years or more) by investing in infrastructure related equities (company shares).

**Performance Target:** To achieve a return in excess of the S&P Global Infrastructure Net Total Return Index over a rolling five year period (after charges). There is no certainty or promise that the Performance Target will be achieved.

The S&P Global Infrastructure Net Total Return Index (the "Index") is a representative index of the global infrastructure related stock market.

**Investment Policy**

**Portfolio Securities**

- The fund will invest at least 80% in infrastructure related equities.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

**Management Process**

- The management team use their discretion (active management) to maintain a diverse mix of infrastructure assets at country, sector and company level.
- Their primary focus is on selecting companies using research techniques to select individual holdings. The research process is focused on finding attractive high quality companies that can be held for the long term through the assessment of their business, the industry they operate in, their financial strength and the capability of their management team.
- Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.

**Derivatives and Techniques**

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested

while maintaining the fund's existing allocations to equities.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

**Recommendation:** the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Emerging Markets Risk** - The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than

their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.84%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 28/02/2023.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

Prospective investors should consult their own professional advisers on the potential tax consequences of acquiring, holding or selling shares. abrdn Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the abrdn OEIC II.

Other share classes are available in the fund and further information about these can be found in the abrdn OEIC II Prospectus.

abrdn OEIC II is an umbrella structure comprising a number of different sub funds, one of which is this fund.

This document is specific to the fund and share class stated at the beginning of this document. However, the Prospectus, annual and half-yearly reports are prepared for the entire umbrella.

The assets of a sub fund within the umbrella belong exclusively to that sub fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body including abrdn OEIC II and any other sub fund. Any liability incurred on behalf of or attributable to any sub fund shall be discharged solely out of the assets of that sub fund.

Investors may switch their shares in the fund for shares in another sub fund within the abrdn OEIC II. For further information please refer to the prospectus (section on 'Switching') which can be found at [www.abrdn.com](http://www.abrdn.com).

**abrdn Global REIT Tracker Fund, a Sterling denominated sub fund of the abrdn OEIC IV, N Acc Shares (ISIN: GB00BK5HLJ16). This fund is managed by abrdn Fund Managers Limited.**

OBJECTIVES AND INVESTMENT POLICY

**Investment Objective**  
To generate growth over the long term (5 years or more) by tracking the return of the FTSE EPRA/NAREIT Developed Index (Hedged to GBP).

**Performance Target:** To match the return of the FTSE EPRA/NAREIT Developed Index (Hedged to GBP) (before charges). There is no certainty or promise that the Performance Target will be achieved. The FTSE EPRA/NAREIT Developed Index (Hedged to GBP) (the "Index") is a representative index of property related companies listed on global developed stock markets.

**Investment Policy**  
**Portfolio Securities**  
- The fund will invest at least 90% in global equities (company shares) that make up the Index.  
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

**Management Process**  
- The management team aims to replicate performance of the Index in deciding which investments are to be included in the portfolio (passive management) and the number and weightings of investments may vary.  
- Due to the nature of the passive management process, the fund's performance deviation from the Index is expected to be minimal.

**Derivatives and Techniques**  
- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund and reduce (hedge) risk related to currency movements on nonsterling equities.  
- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.  
- Derivatives may also be used to maintain allocations to equities while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.

Investors in the fund may buy and sell shares on any dealing day (as

defined in the Prospectus).  
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

**Recommendation:** the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 5 because of the extent to which the following risk factors apply:

- **Tracking Error Risk** - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- **Currency Hedged Indices Risk** - Due to timing differences, currency hedging applied to the fund may differ to that of the index. This may mean that the fund's performance deviates from that of the index.
- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Concentration Risk** - A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.
- **Real Estate Investment Trust (REIT) Risk** - Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of

the derivative.  
All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

## Artemis SmartGARP UK Equity Fund (the “fund”)

The fund is managed by Artemis Fund Managers Limited.

ISIN:	GB00B2PLJM64
Class:	Class I accumulation units, GBP

This key investor information document is accurate as at 15 February 2024.

### OBJECTIVES AND INVESTMENT POLICY

#### Objective

To grow capital over a five year period.

#### Investment policy

##### What the fund invests in

- 80% to 100% in company shares.
- Up to 20% in bonds, cash and near cash, other transferable securities, other funds (up to 10%) managed by Artemis and third party funds, money market instruments, and derivatives.

##### Use of derivatives

The fund may use derivatives for efficient portfolio management purposes to:

- reduce risk
- manage the fund efficiently.

##### Where the fund invests

- At least 80% in the United Kingdom.
- Up to 20% in other countries.

##### Industries the fund invests in

- Any

##### Other limitations specific to this fund

- None

##### Investment strategy

- The fund is actively managed.
- A proprietary tool called 'SmartGARP' is used as the foundation of the investment process. It screens the financial characteristics of companies by identifying those that are growing faster than the market but are trading on lower valuations than the market.
- The manager selects companies that in aggregate have good 'SmartGARP' characteristics. This tends to mean that the portfolio contains stocks that have lower valuations than the market average, upgrades to profit forecasts, and are under-owned by the investment community, while at the same time benefiting from helpful trends in the wider economy.

#### Benchmarks

##### FTSE All-Share Index TR

A widely-used indicator of the performance of the UK stockmarket, in which the fund invests. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

##### IA UK All Companies NR

A group of other asset managers' funds that invest in similar asset types as this fund, collated by the Investment Association. It acts as a 'comparator benchmark' against which the fund's performance can be compared. Management of the fund is not restricted by this benchmark.

#### Other information

**Dealing frequency:** Normally Monday to Friday except UK public holidays and non-dealing days. Visit [www.artemisfunds.com/non-dealing-days](http://www.artemisfunds.com/non-dealing-days) for more information. Instructions received before 12 noon UK time will be processed at 12 noon on the same day.

**Distribution policy:** This is an accumulation class. Income received is reinvested in the value of the fund.

### RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.
- A risk indicator of "1" does not mean that the investment is "risk free".

Risk indicator number is accurate as at: 31 December 2023.

**The risk indicator may not fully take into account the following risks and the following may affect fund performance:**

**Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

**Currency risk:** The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

##### Other limitations specific to this fund

- Total short exposures to equity derivatives will not exceed 10% of the fund.

##### Investment strategy

- The fund is actively managed.
- The manager generates ideas from a number of sources of information, detailed financial analysis and wider economic analysis. A systematic approach is used to collect, assess, and cross-reference this information.
- A company's valuation relative to the industry in which it operates is also considered.
- While considering factors which are unique to a company, the manager seeks companies whose valuations are overly conservative in relation to their peers and that provide attractive opportunities for a future upgrade.
- Short positions can be taken where stock-specific insight identifies an over-valued company.

### RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.

- The risk category has been calculated using historic data and may not be a reliable indicator of the fund's future risk profile.

- A risk indicator of “1” does not mean that the investment is “risk free”.

Risk indicator number is accurate as at: 31 December 2023.

**The risk indicator may not fully take into account the following risks and the following may affect fund performance:**

**Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

**Currency risk:** The fund's assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund's value

**Concentration risk:** The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.

**Charges from capital risk:** Where charges are taken wholly or partly out of a fund's capital, distributable income may be increased at the expense of capital, which may constrain or erode capital growth.

**Derivatives risk:** The fund may invest in derivatives with the aim of profiting from falling ('shorting') as well as rising prices. Should the asset's value vary in an unexpected way, the fund value will reduce.

**Leverage risk:** The fund may operate with a significant amount of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in its value and therefore entails a high degree of risk including the risk that losses may be substantial.

Please refer to the fund's prospectus for full details of these and other risks which are applicable to this fund.

# KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

**Aviva Investors Global Equity Income Fund, Class 2, Accumulation shares, GBP**, a sub-fund of the Aviva Investors Investment Funds ICVC (ISIN: GB0030442098). The Fund is managed by Aviva Investors UK Fund Services Limited.

## OBJECTIVES AND INVESTMENT POLICY

**Objective:** The Fund aims to grow your investment through a combination of income and capital growth and provide an average annual net return greater than the MSCI® All Country World Index (GBP) (the "Index") over a rolling 5 year period, by investing in shares of global companies.

Within this combined return, the Fund aims to deliver an income equivalent of at least 125% of the income return of the Index, over any given 12-month period.

**Core investment:** At least 80% of the Fund will be invested in shares of global companies. "Global companies" means companies in any country across the globe, including with up to 20% of the Fund invested in emerging markets.

**Other investments:** The Fund may also invest in other shares, other funds (including funds managed by Aviva Investors companies), cash and deposits.

Derivatives, such as futures, may be used from time to time, to gain a particular market exposure which would otherwise be difficult or costly to achieve, or to manage the Fund's cash flows in a cost-effective manner. Derivatives may also be used to reduce risk, such as foreign currency risk within the Fund, which is hedged using Forward Foreign Exchange contracts. This type of derivative usage is called "efficient portfolio management".

**Strategy:** The Fund is actively managed, and the Investment Manager will adopt a high conviction (strong belief) approach aiming to generate the Fund's target income. This will focus on opportunities across what the Investment Manager considers to be mature companies which potentially offer sustainably high dividends, or those which are felt able to steadily grow their dividends while showing financial strength and/or low levels of debt, with a strong management capability. The Fund will also take advantage of businesses in the early stages of development, where high cash generation is driving strong dividend growth. The Investment Manager will aim to invest in companies which have a diversified range of successful products, and which are active in a range of geographical markets.

**Environmental, Social and Governance (ESG) factors:** ESG factors are integrated into the investment process and are considered alongside a range of financial metrics and research, but the Investment Manager retains discretion over which investments are selected. We also actively engage with companies and use voting rights with the aim of positively influencing company behaviour and helping to create competitive returns. In addition, the Fund has limited exclusions based on Aviva Investors' UK Responsible Investment policy. Further information on how we integrate ESG and the Aviva Investors UK Responsible Investment policy into our investment approach, and how we engage with

companies is available on our website and in the prospectus.

**Performance & Risk Measurement:** The Fund's income return target is measured against the Index before the deduction of charges and taxes. The Fund's overall performance is also measured against the Index, after charges and taxes.

The Fund does not base its investment process upon the Index, so will not hold every company in the Index and may also hold companies that do not form part of it.

The Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. The Fund is expected to have an average yearly tracking error of between 2% and 6% when compared to the Index. In certain conditions the Fund may be outside of this range.

The Index comprises large and medium sized companies, as determined by their market capitalisation (total market value of a company's outstanding shares), from both developed and emerging markets, and the Index is designed to provide a broad measure of global equity market performance.

The Index has been selected as a benchmark for the income target and performance and risk measurement because it is representative of the type of companies in which the Fund is likely to invest, and it is therefore an appropriate measure for the Fund's performance.

Note: MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This KIID is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

**Other information:** You can buy and sell shares on any London business day.

This is an accumulation share class and any income from the Fund will remain in the Fund and is reflected in the share price.

For full investment objectives and policy details please refer to the Prospectus.

## RISK AND REWARD PROFILE

**Lower risk**

Typically lower rewards

**Higher risk**

Typically higher rewards

This indicator is based on historical data, calculated using European Union rules, and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The lowest category does not mean 'risk free'.

The value of investments and the income from them will change over time.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

The Fund has been allocated a risk number based on the historic volatility of its share price or where insufficient information is available appropriate asset classes.

**Currency risk:** Changes in currency exchange rates could reduce investment gains or increase investment losses. Exchange rates can change rapidly, significantly and unpredictably.

**Emerging markets risk:** Compared to developed markets, emerging markets can have greater political instability and limited investor rights and freedoms,

and their securities can carry higher equity, market, liquidity, credit and currency risk.

**Equities Risk:** Equities can lose value rapidly, can remain at low prices indefinitely, and generally involve higher risks — especially market risk — than bonds or money market instruments. Bankruptcy or other financial restructuring can cause the issuer's equities to lose most or all of their value.

**Hedging risk:** Any measures taken to offset specific risks will generate costs (which reduce performance), could work imperfectly or not at all, and if they do work will reduce opportunities for gain.

**Illiquid securities risk:** Certain assets held in the Fund could, by nature, be hard to value or to sell at a desired time or at a price considered to be fair (especially in large quantities), and as a result their prices could be very volatile.

**Income Risk:** The investment objective of a Fund is to generate income, at times this may limit opportunities for capital growth.

Full information on the risks applicable to the Fund is detailed in the Prospectus.

## CHARGES

### One-off charges taken before or after you invest

Entry charge None

Exit charge None

### Charges taken from the Fund over a year

Ongoing charges 0.87%

### Charges taken from the Fund under certain specific conditions

Performance fee None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

The ongoing charges figure is based on last year's expenses for the year ending 15 October 2023. The figure for ongoing charges excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges please see the charges sections of the Fund's Prospectus.

## PAST PERFORMANCE

Past performance is no guide to future performance.

The past performance shown in the chart opposite takes into account all charges except entry charges.

The Share Class was launched on 14 May 2001.

Performance is calculated in the Share Class currency which is GBP.

## AXA Framlington Biotech Fund

Unit class : AXA Framlington Biotech Fund Z Accumulation GBP (ISIN: GB00B784NS11)  
This Fund is managed by AXA Investment Managers UK Limited, part of the AXA IM Group

### Objective and Investment Policy

#### Investment Objective

The aim of this Fund is to provide long-term capital growth over a period of 5 years or more.

#### Investment Policy

The Fund invests in shares of listed companies, principally (meaning at least 80% of its assets) in the biotechnology, genomic and medical research industry, which the fund manager believes will provide above-average returns. The Fund invests in companies of any size which can be based anywhere in the world, albeit the Fund tends to be biased towards the US as this is where the majority of biotechnology companies are based. The fund manager selects shares based upon analysis of a company's financial status, quality of its management, expected profitability and prospects for growth.

The fund manager has full discretion to select investments for the Fund in line with the above investment policy and in doing so may take into consideration the NASDAQ Biotechnology Price Return index.

The NASDAQ Biotechnology Price Return index is designed to measure the performance of NASDAQ stocks in the biotechnology sector. This index best represents a core component of the Managers' investment universe.

This Fund is actively managed in reference to the NASDAQ Biotechnology Price Return index, which may be used by investors to compare the Fund's performance.

#### Income

Income from investments in the Fund will be rolled up into the value of your unit if you hold accumulation units.

#### Fund Currency

The reference currency of the Fund is Sterling.

#### Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within five years.

#### Processing of subscription and redemption orders

Your orders to buy, sell or transfer units in the Fund must be received by the Administrator by 12 noon on any working day, to receive that day's Fund price. Please note that if your order is placed by an intermediary or Financial Adviser they may require extra processing time.

The Net Asset Value of this Fund is calculated on a daily basis.

Minimum initial investment: £100,000

Minimum subsequent investment: £5,000

### Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

#### Why is this Fund in this category?

The capital of the Fund is not guaranteed. The Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

#### Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

**Counterparty Risk:** failure by any counterparty to a transaction (e.g. derivatives and securities lending) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

**Single Sector Risk:** as this Fund is invested in a single sector, the Fund's value will be more closely aligned with the performance of that sector and it may be subject to greater fluctuations in value than more diversified funds.

**Currency Risk:** the Fund holds investments denominated in currencies other than the base currency of the Fund. As a result, exchange rate movements may cause the value of investments (and any income received from them) to fall or rise affecting the Fund's value.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

## AXA Framlington Biotech Fund

### Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

#### One-off charges taken before or after you invest

-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The ongoing charges figure is based on expenses for the previous twelve month period. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to AXA IM website: <https://www.axa-im.co.uk/important-information/fund-charges-and-costs> as well as the Fees and Expenses section of the prospectus which is available at <https://funds.axa-im.com>.

### Past performance

Past performance is not a reliable indicator of future results.

Past performance is shown after the deduction of ongoing charges. Any entry/exit fees are excluded from the calculation.

The Sub-Fund was launched on 02/11/2001 and the share class in 2001.

Past performance has been calculated in Sterling and is expressed as a percentage change of the Fund's Net Asset Value at each year end.

The comparator benchmark is the NASDAQ Biotechnology Price Return index.

Baillie Gifford American Fund - Class B GBP Accumulation

Accumulation Shares - ISIN GB0006061963

This Fund is a sub-fund of Baillie Gifford Overseas Growth Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

Objectives and investment policy

Objective

- The Fund aims to outperform (after deduction of costs) the S&P 500 Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Policy

- The Fund will invest at least 90% in shares of US companies of any size and in any sector.
- US companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in the US.
- The Fund may also invest in other transferable securities of US companies and money market instruments.
- The Fund will be actively managed and will be concentrated.

Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards  
lower risk

Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.
- The indicator does not take into account the following relevant material risks.
- The Fund is actively managed meaning the Investment Manager selects investments of their own choosing with the aim of achieving the Fund's objectives. This is done without seeking to replicate any index in either of performance or portfolio composition. This investment style, selecting companies with perceived greater long-term growth potential ahead of any short-term returns, in combination with the relative concentration of the Fund, may lead to prolonged periods of underperformance in certain market conditions, both in relation to the Fund's benchmark and in absolute terms.
- Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.
- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies
- Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.
- For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is at 31/10/2023.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

**BNY MELLON**  
INVESTMENT MANAGEMENT

# BNY Mellon Emerging Income Fund

**INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8GGF462)**

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

## Objectives and Investment Policy

### OBJECTIVE

To achieve income together with capital growth over the long term (5 years or more).

### POLICY

#### The Fund will:

- invest in emerging market countries across the world;
- invest at least 75% in emerging market equities (company shares), including ordinary shares, preference shares and other equity-related securities;
- invest in company shares targeting higher than average dividends (dividends are the proportion of company profits paid out to shareholders) and with good prospects for growth; and
- typically invest in company shares within emerging markets which meet minimum yield thresholds set with reference to the Benchmark and will sell company shares if their yield consistently drops below minimum threshold levels.

#### The Fund may:

- invest in money market instruments, deposits, cash and near cash;
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and

- invest up to 10% in other collective investment schemes.

**Benchmark:** The Fund will measure its performance against the MSCI Emerging Markets NR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because the Investment Manager utilises it when measuring the Fund's income yield.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

### OTHER INFORMATION

**Treatment of income:** net income generated will be retained within the Fund and reflected in the value of your shares.

**Dealing:** you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

## Risk and Reward Profile

Lower risk  
Potentially lower reward

Higher risk  
Potentially higher reward

1 2 3 4 **5** 6 7

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 5 because its historical value has shown moderately high volatility. With a Fund rating of 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

### THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

**Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk:** The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

**Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.

**Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

**Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

**Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.

**Concentration Risk:** A fall in the value of a single investment may have a significant impact on the value of the Fund because it typically invests in a limited number of investments.

**Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.

**High Yield companies risk:** Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.

**Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

**Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".

## Charges

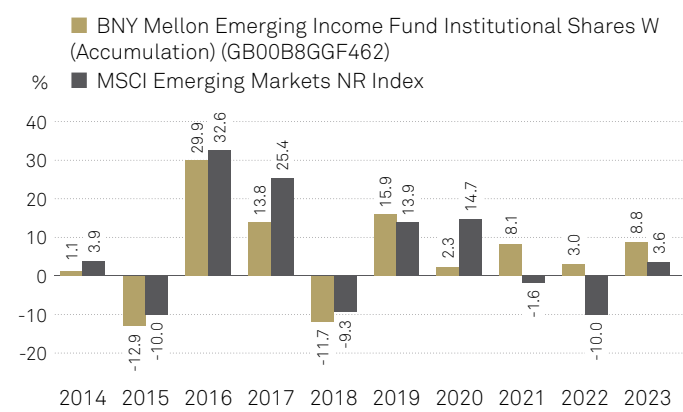

The charges cover the costs of running the Fund, including the costs of marketing and selling. These charges reduce the potential growth of your investment.	
<b>ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST</b>	
Entry charge	<b>0.00%</b>
Exit charge	<b>None</b>
<i>This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.</i>	
<b>CHARGES TAKEN FROM THE FUND OVER A YEAR</b>	
Ongoing charge*	<b>0.94%</b>
<b>CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS</b>	
Performance fee	<b>None</b>

The ongoing charge is based on expenses calculated on 31 December 2023. This may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid when buying or selling units in another investment fund.

\*It should be noted that the ongoing charge figure shown includes ongoing charges in respect of other open-ended investment funds but excludes ongoing charges from closed-ended funds held. The ongoing charges from closed-ended funds held were 0.00% as at 31 December 2023.

More information about charges is available in the "Fees and Expenses" section of the Prospectus.

## Past Performance

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Fidelity European Fund

a sub-fund of Fidelity Investment Funds

Fidelity European Fund W Accumulation Shares

(ISIN:GB00BFRT3504)

This fund is managed by FIL Investment Services (UK) Limited

## Objectives and Investment Policy

**Objective:** The fund aims to increase the value of your investment over a period of 5 years or more and pay you a growing income.

**Investment Policy:** The fund will invest at least 80% in continental European companies. The companies will be either listed, incorporated, domiciled, or have significant business activities in the region. The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.

**Investment Process:** The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities. The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI Europe ex UK Index. The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.

**Derivatives and Techniques:** Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.

**Additional information:** Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund. The fund's performance can be compared to the MSCI Europe ex UK (Net total return) Index.

## Charges for this fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing charges	0.91%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

## Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.'

The ongoing charges figure shown here for this new class is an estimate of the charges. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 4 November 1985. This class was launched on 13 November 2013.

Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an "\*\*"; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

## FTF ClearBridge Global Infrastructure Income Fund

**Class W (acc) GBP • ISIN GB00BMF7D555 • A sub-fund of Franklin Templeton Funds**

The management company is Franklin Templeton Fund Management Limited which is referred to in this document as the authorised corporate director or "ACD".

### Objectives and Investment Policy

The Fund's primary aim is to generate income. The Fund also seeks to grow in value by more than the OECD G7 Inflation Index + 5.5%, from a combination of income and investment growth, over five year rolling periods, before all fees and costs are deducted.

There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

#### Core investments

The Fund invests at least 80% of the Fund's assets in a diverse range of shares of companies listed on the stock exchanges of developed countries. Such companies will operate across a variety of infrastructure sub-sectors, which may include gas, electricity, water, toll-roads, airports, rail and communication.

#### Other investments

The Fund may also invest in:

- recently issued shares of companies which are not yet listed but which are expected to be listed within 12 months of purchase;
- other transferable securities;
- cash and cash equivalents;
- money market instruments; and
- other collective investment schemes (which may include collective investment schemes operated by the ACD or any of its associates). The Fund may not invest more than 10% in other collective investment schemes. The Fund can use derivatives for efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth). However, the Fund can introduce more speculative use of derivatives in the future on 60 days' notice to investors. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, interest rates, share prices or currencies). Up to 10% of the Fund may be invested in derivatives and recently issued securities. While the Fund will normally be invested in accordance with the limits set out above, the Investment Manager has the freedom to invest outside of these limits, sometimes significantly, where the Investment Manager considers that, due to prevailing market conditions, it is in the interests of the Fund and its shareholders to do so.

#### Geographic locations (where we invest)

The Fund may invest in companies operating anywhere in the world. Up to 20% of the Fund's assets may be invested in shares of companies, including depositary receipts (a type of listed security which enables investors to hold shares in foreign companies), issued by companies in emerging markets (countries whose economy and financial markets are still developing).

#### How we select investments (investment strategy)

This Fund is actively managed, which means that the Investment Manager does not copy a benchmark when selecting investments for the Fund. The

Fund usually invests in shares of around 30 – 60 companies, although the Investment Manager may invest in fewer or more companies where it considers this to be in the interests of the Fund.

The Investment Manager selects securities based on their potential return and risk characteristics and role in achieving the Fund's investment objective. The portfolio is not constrained by any market index. The Investment Manager seeks to select infrastructure and utility companies which operate under a regulatory regime, or concession arrangement which provides the Investment Manager with a predictable cash flow and minimum yield. In considering yield, the Investment Manager looks at the dividend yield, the dividend per share expectations over a five year period, and the relationship of a company's dividends and cash flows, over an estimated holding period.

#### ESG (environmental, social, and governance) factors

The Investment Manager integrates financial and non-financial considerations in its assessment of a prospective investment. In selecting the Fund's investments, the Investment Manager assesses prospective investments against various ESG factors, depending on the sector of the investee company. These ESG factors are used to inform the Investment Manager's wider assessment of the value and financial attractiveness of each potential investment and exposures are adjusted accordingly. The Investment Manager may exclude investments depending on their assessment of ESG factors. In addition, the Investment Manager applies automatic exclusions for investments in certain sectors. For more detailed information about how the Investment Manager considers ESG, and a list of exclusions, please see the investment objective and policy in the prospectus for the Fund, available at [www.franklintempleton.co.uk](http://www.franklintempleton.co.uk) in the "Resources and Literature – "Fund Documents" tab.

#### Additional Information

- The Fund's performance can be measured against its performance target. It can also be measured against the FTSE Global Core Infrastructure 50/50 Index, which provides a broad representation of the listed infrastructure industry.

- You may request the sale of your shares in the Fund on any UK business day.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within five years.

The income received from the Fund's investments is accumulated and included in the value of the shares.

#### Terms to Understand

**Shares of companies (equities):** securities that represent an ownership stake in a company.

**Transferable securities:** investments such as shares or debt that can be bought and sold between investors.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is in its risk/reward category because a concentrated investment (the Fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large

fluctuations in value. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Concentration risk:** the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities.

**Investment in infrastructure:** the fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

**Derivative instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

**Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

**Equity risk:** prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance.

**Foreign currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the

assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

## Charges

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

*This is the maximum that might be taken out of your money before it is invested (in the case of the entry charge) or before money is paid out to you when you sell shares in the Fund (in the case of the exit charge).*

### Charges taken from the Fund over a year

Ongoing charges	0.82%
-----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The ongoing charges figure is based on the expenses for the Fund for the year to December 2023 and it may vary from year to year. It is an estimate of the charges made to the Fund over a year to cover the costs of managing, operating, and distributing the Fund. Charges are deducted from the value of the assets held by the Fund and are reflected in the daily price that is used to buy and sell shares in the Fund. These charges reduce the potential growth of your investment and/or the income paid from it. For example, a Fund with an ongoing charges figure of 0.5%, means that an investor would pay £5 in charges over the course of a year for every £1,000 they had invested. Please note that the ongoing charge excludes some other costs (such as those incurred by the Fund when buying and selling securities) so total costs paid by investors each year may be slightly higher than the ongoing charges figure.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds and the Fund's annual report for details on the exact charges made.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP.
- The Fund was launched on 16 September 2022 to receive the assets of FTF ClearBridge Global Infrastructure Income Fund, which was a sub-fund of Franklin Templeton Funds II - another UK UCITS Scheme managed by the ACD (the "merging fund"), which was very similar to the Fund. More information about the merger is available on our website. Because of the similarities between the merging fund and the Fund, we have used the past performance of Class X Acc. GBP in the merging fund for the period from the start of the performance chart up to the launch date of the Fund.

# American Index Fund

a sub-fund of HSBC Index Tracker Investment Funds, (the "OEIC");  
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C  
ISIN: GB00B80QG615

**Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.**

## Objectives and Investment Policy

- The Fund aims to track the performance of the S&P 500 Index (the "Index") before the deduction of charges and tax.
- The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index provider.
- The Fund will invest directly in shares (**equities**) of all of the companies that make up the Index and in the same or very similar proportions in which they are included in the Index.
- However, there may be circumstances when it is not possible or practical for the Fund to invest in shares of all the companies of the Index. The Fund may not invest in all the companies of the Index to manage transaction costs or to reflect market conditions, regulations or HSBC's banned weapons policy.
- The Fund may hold cash and other funds, including funds managed by the **HSBC Group**, to manage day-to-day cash flow requirements.
- The anticipated **tracking error** for the Fund is expected to be up to 0.10%.

### Use of derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management**, including **hedging**. In particular the Fund may use **derivatives** to help it manage cash flows and dividend payments with the aim of generating **returns** that are consistent with the Index. The use of **derivatives** will be consistent with the risk profile of the Fund.
- The Fund may enter into securities lending transactions for up to 29% of its assets. However, this is not expected to exceed 25%.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

## Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

### Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

### Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly

reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Index Tracking Risk** To the extent that the Fund seeks to replicate index performance by holding individual securities, there is no guarantee that its composition or performance will exactly match that of the target index at any given time ("tracking error").
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

## Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charge	0.06%
----------------	-------

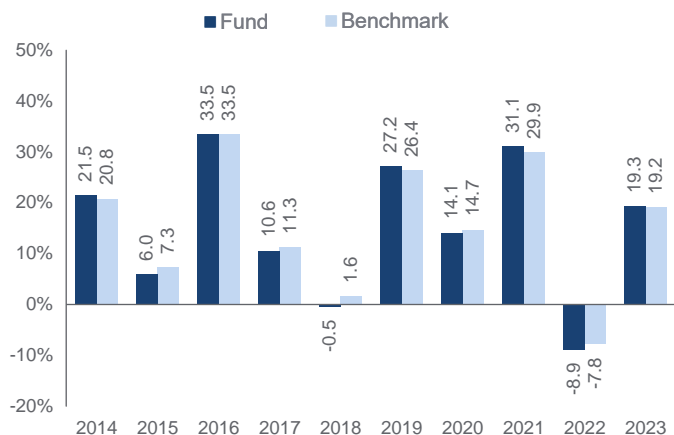

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/11/2023. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

## Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The performance of the Fund is shown against the performance of the S&P 500 Index.
- The Fund was launched on 31 October 1988.

## Practical Information

### Tax

UK tax legislation may have an impact on your personal position.

### Management Company

HSBC Global Asset Management (UK) Limited, the Authorised Corporate Director, may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the OEIC.

### Segregated liability

The OEIC is an umbrella investment company with segregated liability between Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority. HSBC Global Asset Management (UK) Limited is authorised in the United Kingdom and regulated by the Financial Conduct Authority.

This key investor information is accurate as at 09 February 2024.

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco UK Opportunities Fund (UK) (the "Fund")

### A fund of Invesco UK Investment Series (the "Company")

### Y Accumulation share class (ISIN: GB00BJ04KP99) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

## Objectives and Investment Policy

- The objective of the Fund is to achieve long-term (5 years plus) capital growth.
- The Fund invests at least 80% of its assets in shares of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK.
- The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation. The Fund is not constrained by a benchmark and has a flexible approach with no inbuilt bias to sector or company size, investing in what the fund manager believes are the best opportunities, in a typically concentrated portfolio of 35-45 stocks.
- The reference to (UK) in the Fund's name only relates to the Fund's domicile and is unrelated to the Fund's objective and investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

## Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

## Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The Fund typically has a concentrated number of holdings and may have a higher degree of risk than a fund which invests in a broader range of holdings.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Fund. The Manager, however, will ensure that the use of derivatives within the Fund does not materially alter the overall risk profile of the Fund.
- The Fund is invested in companies primarily domiciled in one country, any unfavourable conditions presented on them through country-specific conditions such as changes in regulation, business or economic policy may have a more negative impact on the Fund's performance than on the performance of a fund that is geographically diversified.
- A more detailed description of risk factors that apply to this Fund is set out in Section 29 of the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

JPMorgan Fund ICVC

ISIN: GB00B88MP089

## JPM Natural Resources Fund C - Net Accumulation

a Share Class of JPMorgan Fund ICVC – JPM Natural Resources Fund. The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

### Objectives, Process and Policies

#### INVESTMENT OBJECTIVE

The Fund aims to provide capital growth over the long-term (5-10 years) by investing at least 80% of the Fund's assets in the shares of companies throughout the world engaged in the production and marketing of commodities.

#### INVESTMENT PROCESS

##### Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Investment process built on stock level analysis by a global research team.

**Benchmark** S&P Global Mining & Energy Index Net Return in GBP

##### Benchmark uses and resemblance

- The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

#### POLICIES

**Main investment exposure** At least 80% of assets invested in equities of natural resource companies anywhere in the world, including

emerging markets. Natural resource companies are those that are engaged in the exploration, development, refinement, production or marketing of natural resources and their secondary products.

The Fund may invest in small capitalisation companies.

**Other investment exposures** Cash and near cash on an ancillary basis.

**Derivatives** Used for: efficient portfolio management; hedging. Types: see [Fund Derivative Usage](#) table under [How the Funds Use Derivatives, Instruments and Techniques](#) in the Prospectus. TRS including CFD: none. Global exposure calculation method: commitment.

**Currencies** Fund Base Currency: GBP. Currencies of asset denomination: any. Hedging approach: typically unhedged.

**Redemption and Dealing** Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

**Distribution Policy** This Share Class will reinvest income.

For an explanation of some of the terms used in this document, please visit the glossary on our website at <https://am.jpmorgan.com/gb/en/asset-management/per/funds/administrative-information/>.

### Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

#### OTHER MATERIAL RISKS

The Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective.

The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Fund.

Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

#### [Investment risks](#) Risks from the Fund's techniques and securities

Techniques	Securities	
Concentration	Commodities	Smaller companies
Hedging	Emerging markets	
	Equities	

#### [Other associated risks](#) Further risks the Fund is exposed to from its use of the techniques and securities above

Currency	Liquidity	Market
----------	-----------	--------

#### **Outcomes to the Shareholder** Potential impact of the risks above

<b>Loss</b> Shareholders could lose some or all of their money.	<b>Volatility</b> Shares of the Fund will fluctuate in value.	<b>Failure to meet the Fund's objective.</b>

## Jupiter Monthly Income Bond Fund U1 GBP Acc (GB00BHBX8461)

### A sub-fund of Jupiter Investment Management Series I.

Managed by Jupiter Unit Trust Managers Limited.

#### Objectives and Investment Policy

**Objective:** to seek to achieve income and capital growth by delivering a return, net of fees, greater than that of the Target Benchmark over rolling 3 year periods. The Target Benchmark consists 50% of the ICE BofAML 1-5Y BBB Sterling Corporate Index and 50% of the ICE BofAML Sterling High Yield Index.

**Policy:** At least 70% of the Fund is invested in a diversified portfolio of fixed, variable and zero rate debt securities, which can be issued by companies, governments and other public entities anywhere in the world. This will typically include sub-investment grade (also known as high yield) bonds (i.e. those with a rating of below BBB- as rated by Standard and Poor's or below Baa3 by Moody's).

For those investments not denominated in GBP, the Fund may use techniques to try to reduce the effects of changes in the exchange rate between GBP and other currencies (i.e. hedging). This aims to protect the Fund against losses caused by currency movements between the Fund's base currency, GBP, and the currency of the underlying assets of the Fund.

The Fund may hold investments with loss-absorbing features, including up to 20% in contingent convertible bonds (CoCos).

Up to 30% of the Fund may be invested in other transferable securities, open-ended funds (including other funds managed by Jupiter and its associates), warrants, cash, near cash, money market instruments and deposits.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns (i.e. for investment purposes) and/or reducing the overall costs and risks of the Fund.

The Fund is actively managed. Portfolio construction is driven by an on-going assessment of the drivers of returns such as interest rates, bond prices, economic outlook, inflationary expectations and global political issues. This will also include an assessment of issuers' default risk and value relative to similar bonds in the market.

The benchmark represents a broad universe of higher yielding investment grade and non-investment grade Sterling-denominated corporate bonds. The benchmark is representative of the overall risk exposure in terms of interest rate and credit risk that the fund will undertake in absence of active views on rates or credit spreads. The benchmark should not be seen however as the full investment universe for the fund as the manager will seek to generate value also investing in non-sterling-denominated

bonds.

Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.

**Recommendation:** the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

**Treatment of income:** as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

**Dealing:** you can generally buy and sell shares on any day on which the London Stock Exchange is open for normal business – please refer to the Prospectus for exceptions.

#### Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls). Funds in category 4 have in the past shown moderate volatility. With a fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.
- Currency (FX) Risk** - The Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
- Interest Rate Risk** - The Fund can invest in assets whose value is sensitive to changes in interest rates (for example bonds) meaning that the value of these investments may fluctuate significantly with movement in interest rates.e.g. the value of a bond tends to decrease when interest rates rise
- Pricing Risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- Contingent convertible bonds** - The Fund may invest in contingent convertible bonds. These instruments may experience material losses based on certain trigger

events. Specifically these triggers may result in a partial or total loss of value, or the investments may be converted into equity, both of which are likely to entail significant losses.

- Credit Risk** - The issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due.
- Market Concentration Risk (Geographical Region/Country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.
- Derivative risk** - the Fund may use derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment.
- Counterparty Risk** - the risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.
- Sub investment grade bonds** - The Fund may invest a significant portion of its assets in securities which are those rated below investment grade by a credit rating agency. They are considered to have a greater risk of loss of capital or failing to meet their income payment obligations than higher rated investment grade bonds.
- Charges from capital** - Some or all of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

## Charges

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

### Charges taken from the Fund over a year

Ongoing charges	0.35%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

- These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.
- The ongoing charges figure is based on the fixed annual charge as detailed in the prospectus. With effect from 23/02/24 the fixed annual charge may be subject to a discount based on the value of the Fund's scheme property. The current discount rate, if applicable, can be found at [www.jupiteram.com/tiered-pricing](http://www.jupiteram.com/tiered-pricing). Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- You can find out more details about the charges by looking at Schedule 1 of the prospectus.

## Legal & General Global Technology Index Trust Unit Class I GBP Accumulation - ISIN: GB00B0CNH163

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited (the "Manager").

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE World -Technology Index, the "**Benchmark Index**" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
  - The Benchmark Index is comprised of shares in companies from the developed and advanced emerging markets that are engaged in information technology and are included in the Benchmark Index.
  - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
  - The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.
  - The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
  - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
    - reduce risk or cost; or
    - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**

  - The Fund is passively managed as it tracks the Benchmark Index.
  - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
  - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3pm. This is the time we calculate unit prices for this Fund. If you contact us after 3pm, the units will be bought or sold at the next business day's price.
  - The Fund's base currency is denominated in GBP.
  - This Fund may be suitable for investors looking to track the shares in companies from developed and advanced emerging markets that are engaged in information Technology as represented by the Benchmark Index.
  - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
  - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
  - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
  - The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
  - Even a fund in the lowest category is not a risk free investment.
  - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the

- Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- The return from this Fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the Fund.
  - Most of the Fund holds investments from a particular market sector, that of information technology. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
  - The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
  - Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
  - The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The price for buying and selling units is subject to a Dilution Adjustment See opposite.	
Charges taken from the fund over each year	
Ongoing charge	0.32%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2023. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the Income of the Fund.

**Other costs:**

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.05% for purchases and 0.07% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.

For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [www.legalandgeneral.com/chargesandfees](http://www.legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in GBP.
- The Fund may not replicate the performance of the Benchmark Index perfectly due to tracking errors such as expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2000.
- This unit class launched in 2005.

## PRACTICAL INFORMATION

Liontrust UK Growth Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Inc class (ISIN: GB00B56BD509). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

## Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

## Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus.

## Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

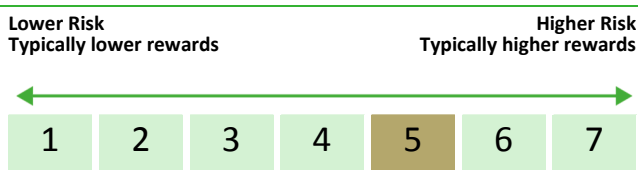

## How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).  
The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means the price investors buying and selling receive is reflective of the underlying transaction costs related to the subscription or redemption to avoid any dilution in the fund's value for existing investors. For a fuller explanation, please visit [www.liontrust.co.uk](http://www.liontrust.co.uk).

## Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
  - Intellectual property
  - Strong distribution channels
  - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

## Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund invests in UK & Irish equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The fund's investment objective is to target capital growth for investors. Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more

volatile returns than the market as a whole.

- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

#### Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year

## M&G Strategic Corporate Bond Fund

Sterling Class I – Accumulation shares ISIN no. GB00B7J4YT87

Managed by M&G Securities Limited

### Objective and investment policy

**Objective:** The fund aims to provide a combination of capital growth and income, net of the Ongoing Charge Figure, that is higher than the average return of the the iBoxx Sterling Corporates GBP Index over any five-year period.

**Core investment:** At least 70% of the fund is invested, directly or through derivatives, in investment grade bonds and investment grade asset-backed securities, issued by companies from anywhere in the world, including emerging markets. These securities can be denominated in any currency.

The fund aims to hedge any non-sterling assets back to sterling.

Investments in asset-backed securities are limited to 20% of the fund.

**Other investments:** The fund may invest in bonds issued by governments, high yield bonds, high yield and unrated asset-backed securities, other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

**Derivatives usage:** For investment purposes and to reduce risk and cost.

**Strategy in brief:** The fund manager selects investments based on an assessment of a combination of macroeconomic, asset, sector, geographic and stock-level factors. The fund manager can take a high-conviction approach when selecting bonds. Spreading investments across issuers and industries is an essential element of the strategy.

**Benchmark:** the iBoxx Sterling Corporates GBP Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction. The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The benchmark is shown in the share class currency.

**Additional information can be found on the M&G website, including:**

- a [glossary](#) providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

#### Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

**Recommendation:** This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.43%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 31 August 2023. This figure may change from year to year. It excludes portfolio transaction costs. This figure includes extraordinary expenses and underlying charges for closed-ended-funds, such as investment trusts and Real Estate investment trusts.

For more information on charges, please see the relevant sections of the Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

## Past performance

- Past performance is not a guide to future performance.
- Performance calculation excludes UK taxes from 01 December 2016. It does not take into account the entry and exit charges but does take into account the ongoing charge, as shown in the charges section.
- The fund launched on 20 February 2004 and the Sterling Class I Accumulation share class launched on 03 August 2012.
- Performance is calculated using Sterling Class I Accumulation shares.
- Benchmark performance has been calculated in GBP.
- With effect from 06 March 2023 the benchmark will be iBoxx Sterling Corporates GBP Index.

## M&G UK Inflation Linked Corporate Bond Fund

a sub-fund of M&G Investment Funds (10)  
Sterling Class I – Accumulation shares ISIN no. GB00B460GC50  
Managed by M&G Securities Limited

### Objective and investment policy

**Objective:** The fund aims to protect the value of capital and income from inflation by providing combined income and capital growth, net of the Ongoing Charge Figure, that is consistent with or higher than UK inflation (as measured by the UK Consumer Prices Index), over any three-year period.

There is no guarantee that the fund will achieve its objective over this, or any other, period. The income distributions and the value of your investment may rise and fall, and you may not get back the amount you originally invested.

**Core investment:** At least 70% of the fund is invested, directly or indirectly, in high quality corporate bonds, typically inflation-linked corporate bonds and floating rate notes, from anywhere in the world, including emerging markets. These bonds are denominated in sterling or hedged back to sterling. The fund gains indirect exposure to inflation-linked bonds by combining inflation-linked government bonds with derivatives.

**Other investments:** The fund may invest in other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

**Derivatives usage:** For investment purposes and to reduce risk and cost.

**Strategy in brief:** The fund is designed to provide protection from the negative effects of inflation by being positioned with a low sensitivity to movements in interest rates. Spreading investments across issuers and countries is also an essential element of the fund's strategy.

**Benchmark:** UK Consumer Prices Index

The benchmark is a target which the fund seeks to outperform. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The fund manager has complete freedom in choosing which investments to buy, hold and sell in the fund.

For unhedged and hedged share classes, the benchmark is shown in the share class currency.

**Additional information can be found on the M&G website, including:**

- a [glossary](#) providing an explanation of some terms used in this document.
- the Prospectus including the fund's objective and investment policy.

#### Other information

You can buy and sell shares in the fund on any business day. Instructions received before 12 noon will be dealt at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

### Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 3 because its Net Asset Value has shown very low to medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

■ The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ During periods of sudden increases in inflation in which bonds underperform, the fund's ability to meet its objective may be reduced.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at [www.mandg.co.uk/literature](http://www.mandg.co.uk/literature)

# American Franchise Fund

A sub-fund of Ninety One Funds Series ii  
managed by Ninety One Fund Managers UK Limited

Class I Accumulation shares in sterling  
ISIN: GB00B1XFJ342

### Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of USA companies (those incorporated in, domiciled in, or that have significant economic exposure to, the USA) and in related derivatives (financial contracts whose value is linked to the price of the shares of such USA companies).

The Fund focuses on investing in companies believed to be of high quality, which are typically associated with strong brands or franchises.

Investment opportunities are identified using in-depth analysis and research on individual companies.

The Fund may at times invest in a relatively small number of companies. These companies may be of any size and in any industry sector.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The S&P 500 Net Return Index is used for performance comparison. The Fund does not seek to replicate the index.

The IA North America Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

**Risks that may not be fully captured by the Risk and Reward Indicator:**

**Concentrated portfolio:** The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

**Geographic / Sector:** Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that, in certain market conditions, the value of the portfolio may decrease whilst more broadly-invested portfolios might grow.

**Style Bias:** The use of a specific investment style or philosophy can result in particular portfolio characteristics that are different to more broadly-invested portfolios. These differences may mean that, in certain market conditions, the value of the portfolio may decrease while more broadly-invested portfolios might grow.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2023. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

## Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 23 September 2002 and this share class on 1 June 2007.

# UK Special Situations Fund

A sub-fund of Ninety One Funds Series i  
managed by Ninety One Fund Managers UK Limited

Class J Accumulation shares in sterling  
ISIN: GBO0BD5J0X50

### Objectives and investment policy

The Fund aims to provide capital growth (to grow the value of your investment) and income over at least 5 years.

The Fund invests primarily (at least two-thirds) in the shares of UK companies (those incorporated in, domiciled in, or that have significant economic exposure to, the UK) and in related derivatives (financial contracts whose value is linked to the price of the shares of such UK companies).

The Fund focuses on investing in assets believed to be undervalued by the market. Investment opportunities are identified using in-depth analysis and research on individual companies.

The Fund may, at times, invest in a relatively small number of companies. These companies may be of any size and in any industry sector.

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used in order to achieve the Fund's investment objectives or with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The FTSE All-Share Total Return Index is used for performance comparison. The Fund does not seek to replicate the index.

The IA UK All Companies Sector (a peer group of broadly similar funds) average is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares. You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

Lower risk  
Potentially lower rewards

Higher risk  
Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of the investments made by the Fund.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the Fund invests in the shares of companies, whose values tend to fluctuate widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Concentrated portfolio:** The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

**Geographic / Sector:** Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that, in certain market conditions, the value of the portfolio may decrease whilst more broadly-invested portfolios might grow.

**Liquidity:** There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than might be anticipated.

**Style Bias:** The use of a specific investment style or philosophy can result in particular portfolio characteristics that are different to more broadly-invested portfolios. These differences may mean that, in certain market conditions, the value of the portfolio may decrease while more broadly-invested portfolios might grow.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 30 September 2023. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge	0.75%
----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	None

## Past Performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 2 October 1978 and this share class on 4 October 2013.

## Royal London Diversified Asset-Backed Securities Fund (Accumulation – Class Z Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B4K6P774

Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve a positive absolute return in all market conditions over rolling 3-year periods, by investing at least 80% in asset-backed securities and other sterling-denominated corporate bonds.

The Fund does not offer any element of capital protection or guarantee that this return will be achieved.

The Fund's performance target is to outperform, before the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) plus 2% per annum over rolling 3 year periods.

The Fund is actively managed.

**Policy** At least 80% of the Fund's assets will be invested in asset backed securities and other sterling corporate bonds, which will generally be fixed and floating-rate issues.

Where the manager believes it is in the best interests of the Fund, they may invest the remainder of the Fund's assets in a range of securities, including government bonds, index-linked bonds and bonds denominated in currencies other than sterling.

Up to 10% may be invested in other funds, known as collective investment schemes. A limited amount may also be invested in money market instruments and other transferable securities.

The Fund may also hold derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management.

Cash is unlikely to exceed 5% of assets.

**Recommendation** The Fund may not be appropriate for individual investors or investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

**Positive absolute return** The gain in an asset's value in absolute terms, rather than in relative terms.

**Rolling 3 Year Period** A rolling 3-year period is any period of three years, no matter which day you start on.

**Efficient Portfolio Management** A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 3 because its share price has shown a medium to low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Investment Risk** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

**Exchange Rate Risk** Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

**Counterparty Risk** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

**Government and Public Securities Risk** The Fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.

**Leverage Risk** The Fund employs leverage with the aim of increasing the Fund's returns or yield, however it also increases costs and its risk to capital. In adverse market conditions the Fund's losses can be magnified significantly.

**Credit Risk** Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

**EPM Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

Charges

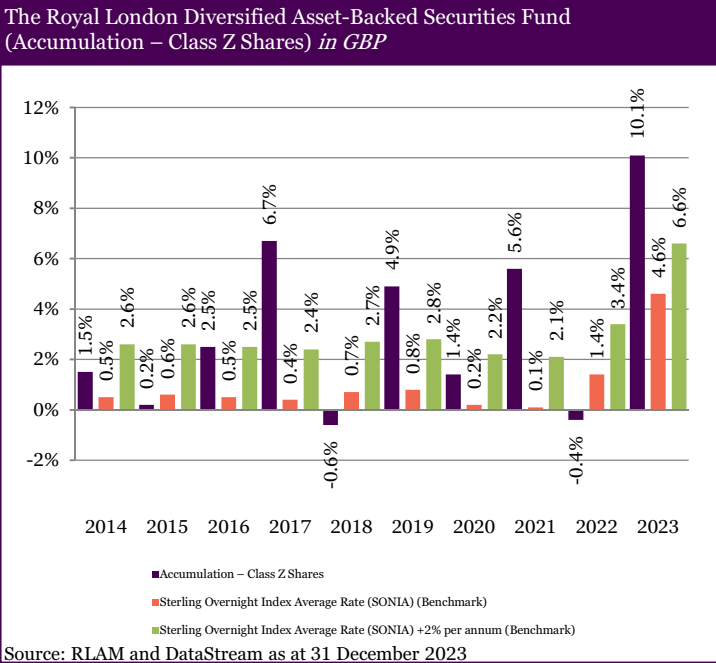

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.43%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay. The Fund was launched on 24 September 2012 and the share class on 24 September 2012.

Past performance is not a guide to future performance and may not be repeated. The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested. The Performance target (SONIA +2% pa) was applied to the fund in 2020. Therefore data prior to this date has been excluded from the graph.

## Royal London Global Equity Select Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00BF93W972

Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve capital growth over the long term (at least 7 years) by investing at least 80% in the shares of companies globally that are listed on a stock exchange.

The Fund's performance target is to outperform, after the deduction of charges, the MSCI World Net Total Return Index GBP (the "Index") by 2.5% per annum over rolling 3-year periods. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

**Policy** At least 90% of the Fund will be invested in shares of companies globally, both in developed and emerging markets.

The Fund may also invest up to 10% in other investment funds, known as collective investment schemes. Small investments may also be made in other transferable securities, money market instruments, cash and deposits.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management (EPM).

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

**Investment Risk** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

**Concentration risk** The price of Funds that invest in a reduced number of holdings, sectors, or geographical areas may be more heavily affected by events that influence the stockmarket and therefore more volatile.

**EPM Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

**Exchange Rate Risk** Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

**Emerging Markets Risk** Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.

**Counterparty Risk** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

### Sarasin Food & Agriculture Opportunities, a sub-fund of Sarasin Funds ICVC Class P Accumulation Shares

ISIN:GB00B77DTQ97

This Fund is managed by Sarasin Investment Funds Limited

## Objectives and Investment Policy

### Objective

We seek to grow the Fund through increases in investment value and income over a rolling 5 year period after deducting fees and costs.

### Investment Policy

We invest at least 80% of the Fund in companies from around the world.

The Fund invests mainly in the shares of companies, but may also invest in other funds (including those managed by Sarasin), exchange traded funds (funds which can be traded on major stock exchanges similarly to a company share) and exchange traded commodities (which track the performance of a commodity index).

We avoid companies that are materially engaged in certain sectors, including the production or distribution of tobacco, armaments, gambling and adult entertainment.

The fund is actively managed. We carefully select the Fund's investments to have exposure to the food and agriculture sectors in any country/region.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

As the Fund invests in a very specific investment universe, investors should consider performance over a long term time period (5-10 years) against either a broad market index or peer group of Global Food and Agriculture funds such as the Morningstar EAA Fund Sector Equity Agriculture sector.

### Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

### Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London.

### Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the Prospectus.

## Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 6 reflecting observed historical returns. This ranking is typically higher than a fund which invests in cash deposits, as company share price movements tend to be more volatile.

The following risks may not be fully captured by the Indicator:

- **Liquidity Risk:** In stressed market conditions the value of certain investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.
- **Counterparty and Settlement Risk:** The fund may enter into derivative transactions in over-the-counter markets, which will expose the fund to the credit risk of their counterparties. The fund may be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the

relevant contract. In the event of the bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the fund seeks to enforce its rights.

- **Derivatives Risk** can only be used to manage the fund more efficiently in an attempt to reduce the overall risk of its investments, reduce the costs of investing or generate additional capital or income. Although this may not be achieved and may create losses greater than the cost of the derivative.
- **Derivatives:** If a derivative transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives), it may not be possible to initiate a transaction to liquidate a position at an advantageous price, to assess or value a position or to assess the exposure to risk. An adverse price movement in a derivative position may also require a cash payment to counterparties that might in turn require, if there is insufficient cash available in a fund, the sale of investments under disadvantageous conditions.
- **Small Cap Equities:** Smaller company shares can be riskier as they may be more difficult to buy and sell and their share price may fluctuate more than that of larger companies.
- **Emerging Market Equities Risk:** Emerging markets may face more political, economic or structural challenges than developed markets and shares may be less liquid, meaning that investments may not be sold quickly enough to prevent or minimize a loss; they may therefore involve a higher risk than investing in developed markets.
- The fund has charges deducted from capital. This may reduce the potential for growth.

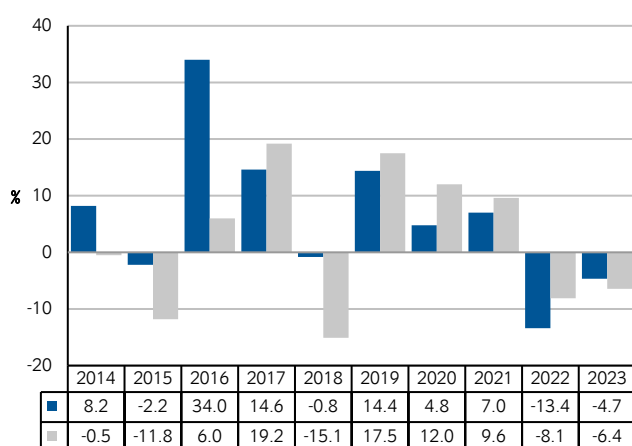

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

- The ongoing charges figure is based on expenses for the twelve month period ending 31.12.2023. This figure may vary from year to year. It excludes: portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling in another fund "if any".
- We may apply a dilution adjustment to the share price of the fund to cover the dealing costs when there are large inflows and outflows from the fund. This adjustment is in place to protect the value of existing investors' holdings.
- For more information about charges, please refer to the relevant sections of the Prospectus available at [www.sarasinandpartners.com](http://www.sarasinandpartners.com)

## Past Performance

■ Sarasin Food & Agriculture Opportunities

■ EAA Fund Sector Equity Agriculture\*

\*Source: Morningstar

- The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart.
- Past performance is not a guide to future performance, prices may fluctuate and you may not get back your original investment.
- The performance figures include all ongoing charges and exclude any entry charges or exit charges.
- The past performance was calculated in GBP on a net asset value basis with gross dividends reinvested.
- The Fund was launched on 31/03/2008
- This Share Class was launched on 15/10/2012
- Sarasin regularly reviews available indices that could be used as performance benchmarks for its funds. As the Fund invests in a very specific investment universe, investors should consider performance over a long term time period (5-10 years) against either a broad market index or peer group of Global Food and Agriculture funds.

## Practical Information

**Depository:** NatWest Trustee and Depositary Services Limited.

You can get further detailed information regarding the Fund, including how to buy, sell and switch units within the Prospectus, the Annual and Semi-annual Reports and Accounts and Company's latest Value Assessment report which are available free of charge from Sarasin & Partners LLP. These are available in English only. You can also call us on 0333 300 0373, or look on our website: [www.sarasinandpartners.com](http://www.sarasinandpartners.com) for further information including the latest share prices.

**Benchmark:** Where applicable, the target benchmark is selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. Where applicable, the comparator benchmark is selected because the Investment Manager and the Manager believe that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

**Fund Information:** The Fund is a sub-fund of the Sarasin Funds ICVC which is an investment company with variable capital incorporated under the OEIC Regulations. It is a UCITS scheme as defined in the FCA Collective Investment Schemes Handbook. This Key Investor Information Document describes a sub-fund of the Sarasin Funds ICVC and the Prospectus and Annual and Semi-annual Reports will be prepared for the entire Sarasin Funds ICVC.

**Liability Statement:** Sarasin Investment Funds Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

**Fund Liability:** The assets of the Fund are segregated from those of the other sub-funds of Sarasin Funds ICVC; therefore, the assets of the Fund will not be available to meet a claim of a creditor or another third party made against another sub-fund.

**Tax Legislation:** The Fund is subject to the tax laws and regulations of the United Kingdom. Depending on your own country of residence, this might have an impact on your investment. For further details you should consult a tax adviser.

**Remuneration Policy:** The Remuneration Policy of the Manager, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at [www.sarasinandpartners.com](http://www.sarasinandpartners.com) or free of charge from Sarasin & Partners LLP, Juxon House, 100 St Paul's Churchyard, London, EC4M 8BU.

## WS Macquarie Global Infrastructure Securities Fund (the "Fund"), B Accumulation Shares, a fund within WS Macquarie Investment Funds (the "Company") (ISIN: GB00B1W2BX03)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

### Objective and investment policy

#### Objective

To achieve a total return (the combination of income and capital growth), after all costs and charges have been taken, over any five year period.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

#### Investment Policy

To invest at least 80% of the fund worldwide (including emerging markets, which are countries whose economies are progressing towards becoming advanced) in the shares of infrastructure companies (companies which own and operate physical infrastructure assets such as toll roads, airports, railways, electric and gas transmission and distribution, water and sewage).

The fund may also invest up to 20% in infrastructure companies, money market instruments (which are short term loans that pay interest) and cash.

Investments in collective investment schemes will be limited to 10%.

The investment manager seeks to invest in infrastructure companies that it considers operate infrastructure assets that provide essential services in support of communities and their respective economies and that in its view will produce superior growth over the long term taking into account a number of factors including strategic position, price structure, regulatory framework, cash flow stability and predictability.

#### Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund will invest in infrastructure, money market instruments and cash both directly and by using, for example, other funds.
- The fund can invest across different geographic regions without limitation.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility, the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Concentration Risk: The fund is largely invested in companies which have exposure to infrastructure. This may mean the fund is more sensitive to price swings than other funds.
- For more information about the fund's risks please see the Risk Factors section of the prospectus which is available at [www.waystone.com](http://www.waystone.com).

## Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.90%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is capped at 0.95%. The actual ongoing charge figure is 0.90% based on expenses as at 16 June 2023. Where the ongoing charge falls below the cap the actual figure applies. This figure may vary from year to year. The ongoing charges are taken from the Income of the fund.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about charges, please see the Company's prospectus which is available at [www.waystone.com](http://www.waystone.com).

## Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in June 2007.
- Past performance takes into account all charges and costs
- Past performance is calculated in GBP.

## WS Ardtur Continental European Fund (the "Fund"), Class P (Institutional) Accumulation, a fund within WS General Global Investment Funds (the "Company") (ISIN: GB00BYX3YX40)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

### Objective and investment policy

#### Objective

To achieve growth in capital (an increase in the value of the fund), above that of the MSCI Daily TR Net Europe Ex UK USD (converted into GBP) over any five year period, after all costs and charges have been taken.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

#### Investment Policy

To invest at least 60% in the shares of companies incorporated or domiciled in Continental Europe.

The fund may also invest up to 30% in the shares of companies not incorporated or domiciled in Continental Europe (including emerging markets, which are countries whose economies are progressing towards becoming advanced), and worldwide in bonds (loans to either a company or government or public body that usually pay interest) and money market instruments (which are short term loans that pay interest) and cash.

The fund may also invest up to 10% to gain commodity exposure (commodities are raw materials such as oil and precious metals, and agricultural products such as wheat and livestock) through transferable securities such as exchange traded commodities. Investments in open ended funds are limited to 10% of the fund's net asset value.

The Investment Manager utilises a number of risk analysis techniques, including but not limited to the historical price of a security, considering research in respect of a security and researching and assessing the economic status of the market in which the security is listed or traded.

The Investment Manager uses a flexible investment approach which aims to take account of and is responsive to anticipated changes in economic and market conditions allowing the fund to typically diversify its exposure across a range of individual investments and industry sectors.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark.
- The fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).
- The fund can invest across different geographic regions, industry sectors and market capitalisations without limitation.
- Exposure to commodities will be through indirect investments only.
- Up to 30% of the fund may be invested in emerging markets, although typical exposure is expected to be less than 10%.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the fund on a limited basis.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest up to 100% in lower risk assets such as cash.
- Forward currency contracts may be used to hedge currency movements in the value of the investments held by the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.

- Liquidity Risk: The fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the fund.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Concentrated fund: The fund may hold a small number of investments and/or invest in stocks with a particular industry, sector or geographical focus. The value of the fund may therefore be subject to large swings (both up and down).
- Smaller Companies Risk: Shares in smaller companies' are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings (both up and down) in their value.
- Alternative Investment Risk: The fund may invest in other investment vehicles to gain indirect exposure to alternative assets including commodities. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- For more information about the fund's risks please see the Risk Factors section of the prospectus which is available at [www.waystone.com](http://www.waystone.com).
